CONTENTS

The geological setting of Santa Monica and San Pedro Basins, California Continental Borderland 1
–D. S. Gorsline

Circulation over the Santa Monica-San Pedro Basin and Shelf 37
–B. M. Hickey

Chlorophyll, photosynthesis and new production in the Southern California Bight 117
–R. W. Eppley

Bacterial transformation and transport of organic matter in the Southern California Bight 151
–F. Azam, D. C. Smith and A. F. Carlucci

Particulate flux in the water column overlying Santa Monica Basin 167
–M. R. Landry, W. K. Peterson and C. C. Andrews

Fecal carbon production by zooplankton in Santa Monica Basin: The effects of body size and carnivorous feeding 197
–L. F. Small and S. G. Ellis

Food web analysis of a planktonic system off Southern California 223
–G. A. Jackson and P. M. Eldridge

Isotopic signatures (^{14}C, ^{13}C, ^{15}N) as tracers of sources and cycling of soluble and particulate organic matter in the Santa Monica Basin, California 253
–P. M. Williams, K. J. Robertson, A. Soutar, S. M. Griffin and E. R. M. Druffel

Vertical and lateral transport of organic carbon and the carbon budget in Santa Monica Basin, California 291
–M. I. Venkatesan and I. R. Kaplan

Microbial utilization and turnover of organic carbon in Santa Monica Basin sediments 313
–D. B. Craven and R. A. Jahnke

Anthropogenic inputs of several heavy metals to nearshore basins off Los Angeles 335
–C.-A. Huh, B. P. Finney and J. K. Stull

Radionuclide concentrations, fluxes, and residence times at Santa Monica and San Pedro Basins 353
–K. M. Wong, T. A. Jokela, R. J. Eagle, J. L. Brunk and V. E. Noshkin

Subject index 393
